

Subject: testimonial

"When I decided to start my own company in the fall of 2004, I did a fairly extensive search for website development companies based in the Philadelphia area. After soliciting proposals from several companies, I decided to use ISITE5 and am very pleased with that decision.

I made my selection based on a combination of price, prompt response time, and portfolio. ISITE5 came out on top in all three areas. The design team provided me with a fantastic site that exceeded my expectations at a price that was unbelievable.

My project involved a combination of front page design needs, search engine optimization, and heavy database interaction. ISITE5 brought all these components together into a great looking, perfectly functioning site.

If you check out my site (<http://www.2Lcoaching.com>) you'll see what a clean, well build, functional site should look like.

Thanks Toto!"
