

To Whom It May Concern:

I am writing to you to heartily recommend isite5 for your project.

Toto Tasso from isite5 was the prime developer and programmer for The Somerset Hills School District's web site (www.shsd.org). Toto did all the work in design, development and programming that we required to get our award-winning site up and running. He worked within our budget and was successful in completing the project well within the time frame we specified. Toto went out of his way to make sure that everything was exactly the way we wanted it.

When we began the interview process for developers, we looked at or interviewed over 30 candidates and companies. The selection process required that the developer not only conform to our budget, design and time requirements, but also demonstrate open communications, involve us in the complete process, and be there for us in the future. Toto was the only candidate to meet all the specifications we laid out and still meet our budget. He also was instrumental in setting up our hosting contract as part of our project.

During the development, Toto was willing to work on site if we required it. While much of the work was done away from our location, he maintained complete contact with us. He was willing to listen to any suggestions we had, and would be honest with us if something would not fit well. When changes to prototypes were needed, often we could view the modifications the same day - sometimes within hours of the request. He was directly reachable; we did not have to phone our changes or requests into an expediter or project coordinator. Toto took direct responsibility for the entire project.

Our initial design comprised close to 200 web pages on our site. The scope of the work was large. We found that Toto was very capable of working with all our data, helping us develop a consistent and appealing look and feel - while maintaining usability and functionality.

After all was done, Toto again went beyond the scope of the project and included training for us to maintain our site. For major revisions we continue to use Toto, and his help and expertise have enabled us to continue to ensure the quality of our site.

I hope I have been able to give you a good idea of the high quality of work you can expect from Toto. We have been very fortunate to have him working with us, and I am very confident that you will be well rewarded by selecting him for your project.

Please feel free to contact me if you have any questions.

Sincerely,
Scott Fitzgerald
